

ATHLETE VISION A.C.E : ATHLETE COGNITIVE ENGINE

BACKGROUND

AthleteVision A.C.E is a next-generation fitness app that centralizes athlete data and uses AI to analyze performance in real time. It bridges the gap between athletes and coaches by providing data-driven insights, optimizing training, nutrition, and recovery to enhance overall performance and efficiency.

OBJECTIVES

1 To develop a centralized athlete management system

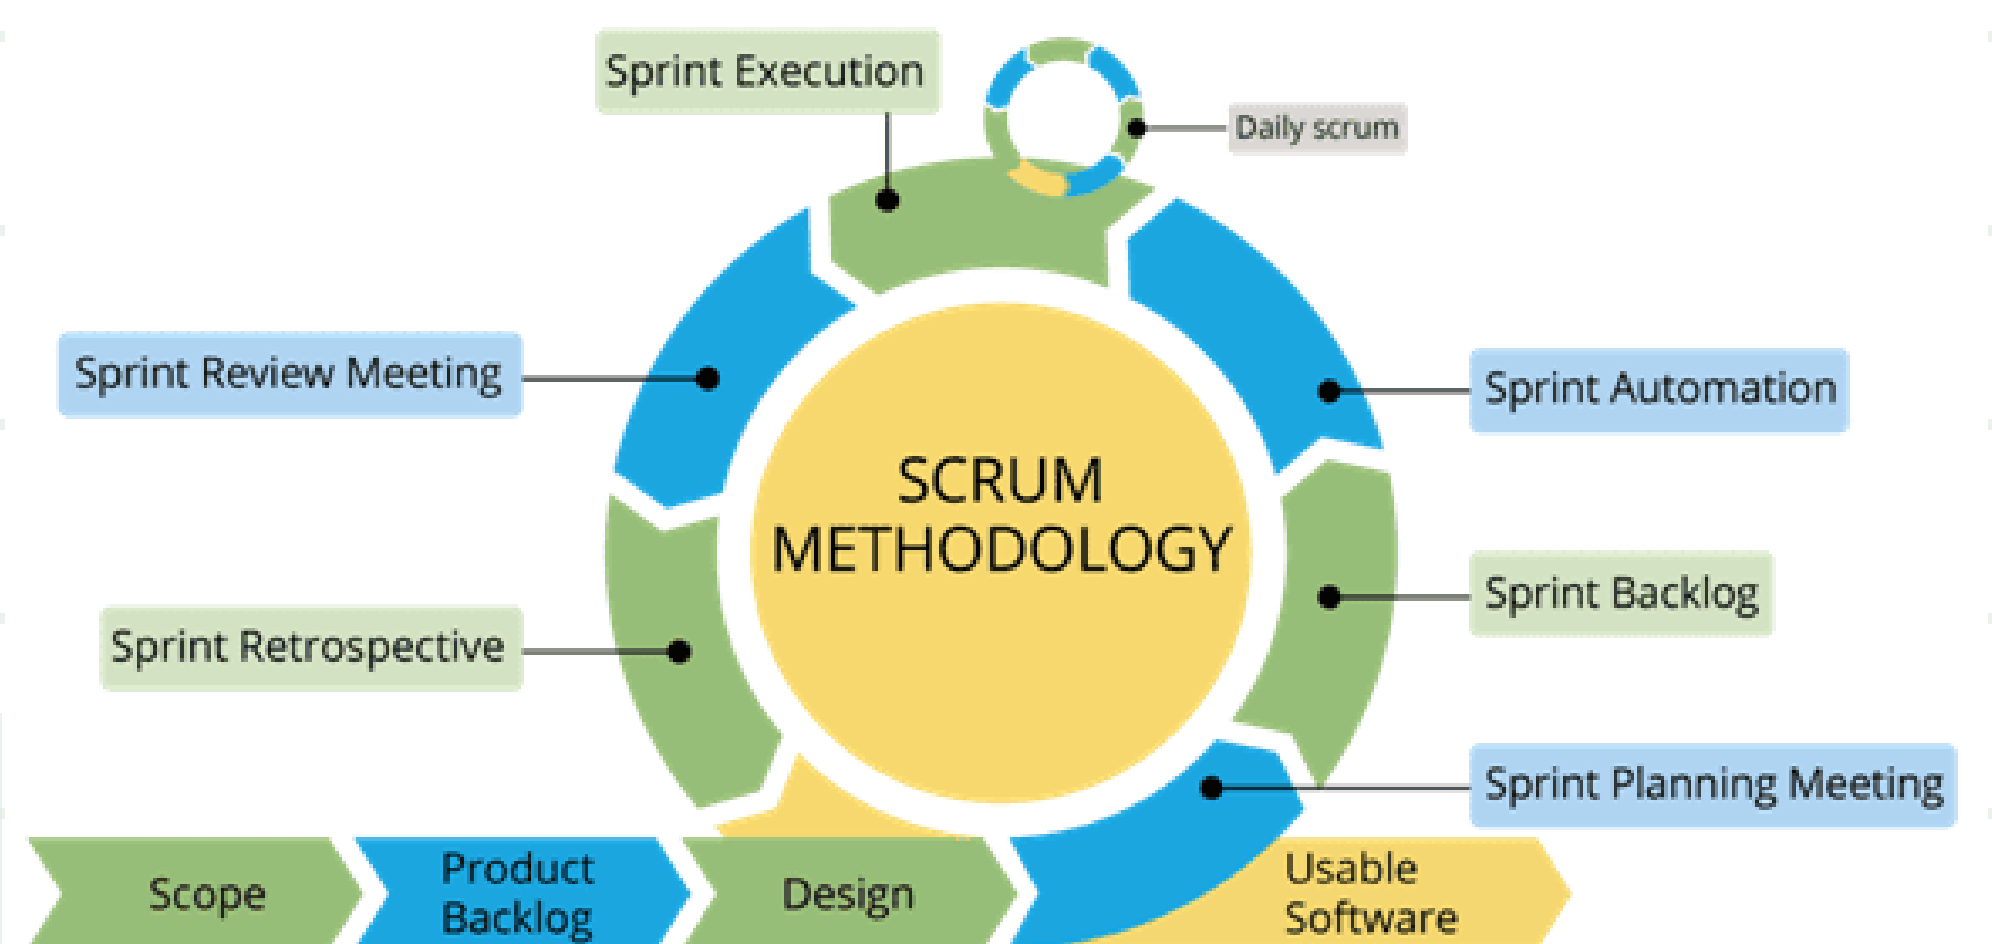

To implement AI-driven analytics for performance insights **2**

3 To design a nutrition and recovery tracking module

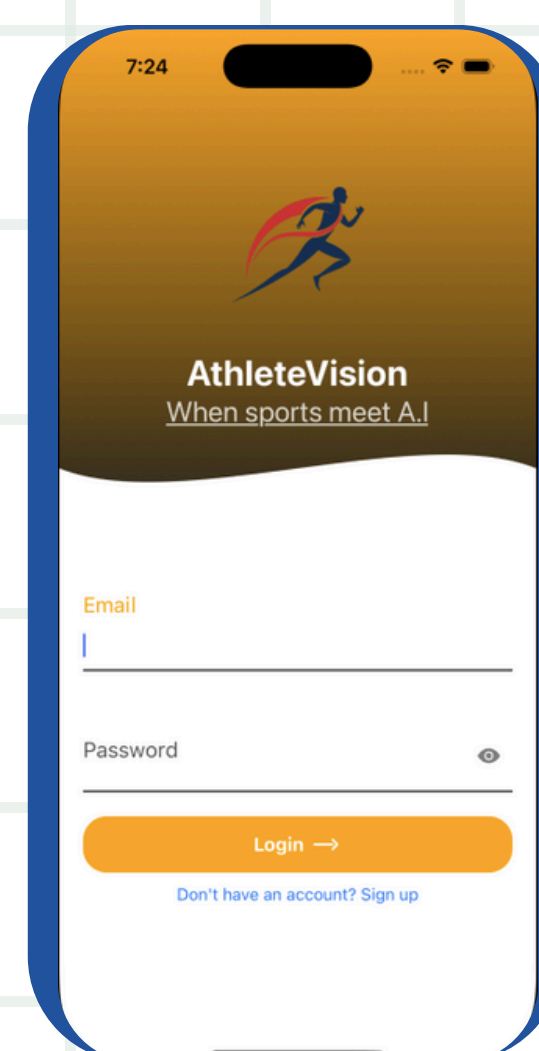

CONCLUSION

AthleteVision A.C.E empowers smarter training through AI and centralized data, enhancing performance, nutrition, and recovery while redefining modern sports management.

METHODOLOGY

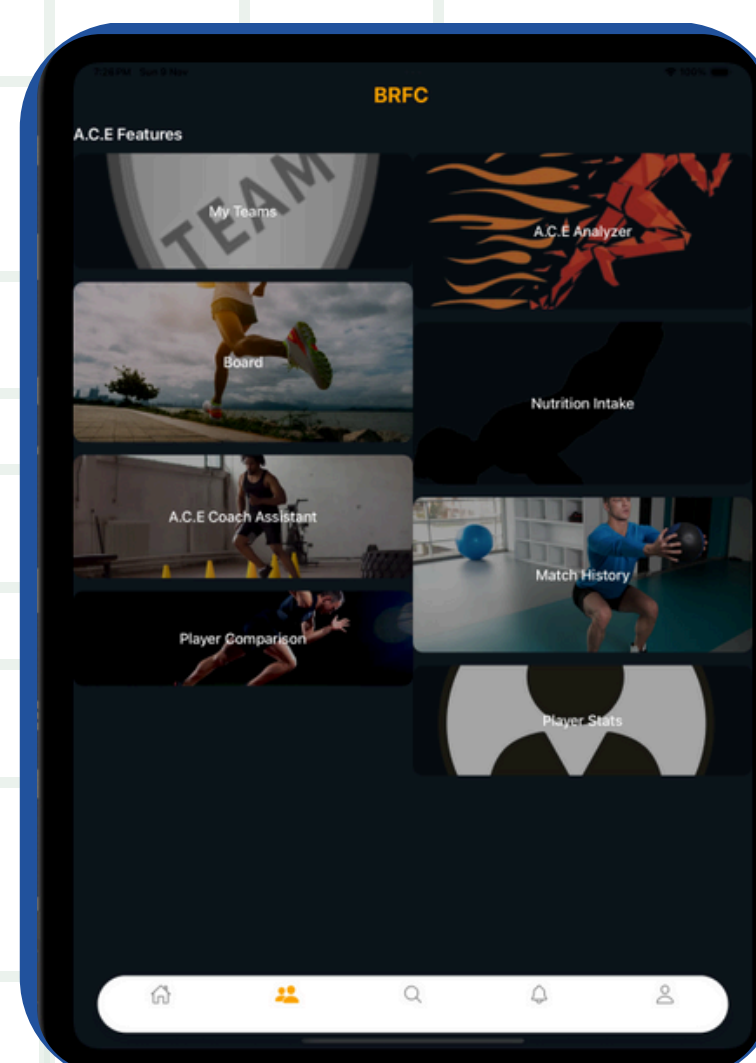

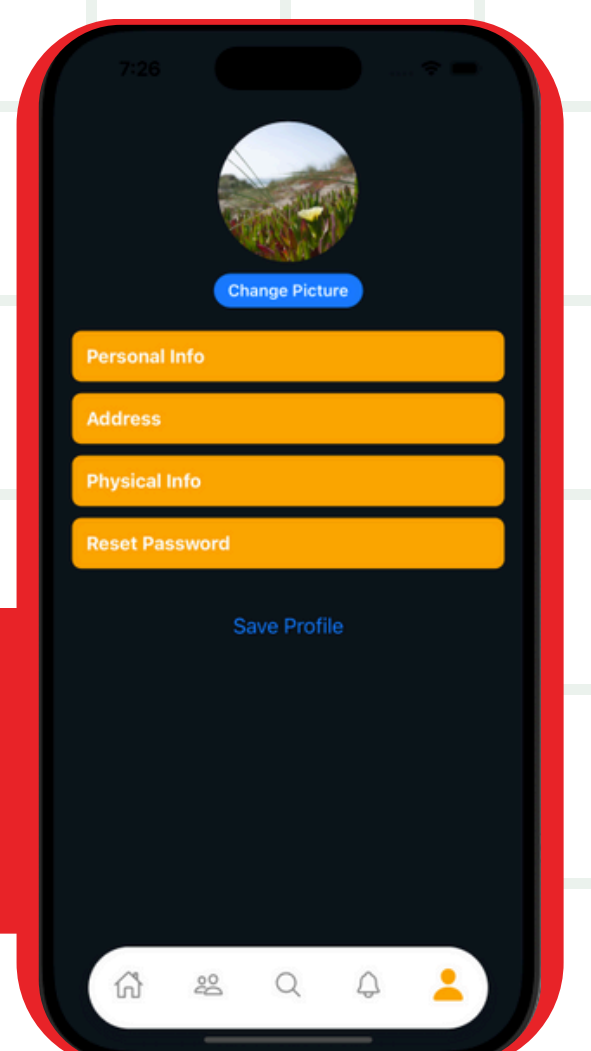

SYSTEM OVERVIEW

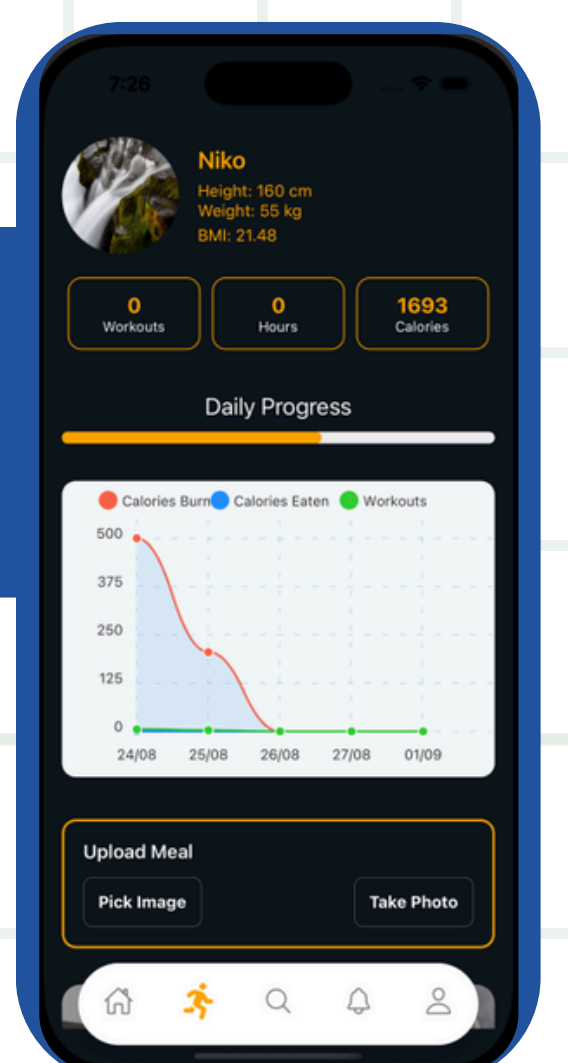

1 All user have to login

Setting up profile page **2**

Coach View

3 Enjoy A.C.E features with no limit
